DUOREST®

# WHY DUOREST

Constant effort under the moto of 'Your comfort is our happiness', DUOBACK CO., LTD. obtained the knowledge of advanced ergonomic technology and skills became a reason why people keep on finding our products.

# ABOUT DUOREST

DUOBACK CO., LTD.'s products became a symbol of 'Ergonomic Chairs' over the years and still a icon of 'Comfort science through a chair' even now.

## Naturalism Chair

Ergonomic Chair and Natural Latex came together! Long lasting comfort and exceptional air circulation, provides healthy and eco friendly office life.

## Customized Chair

According to the user's physic, the backrest depth and height along with the tilting tension can be adjusted to maximize the ergonomic effect.

## Ergonomic Design

Based on the human curves, we ensure full effective blood circulation along with comfort fit to my body.

# UPGRADE OFFICE LIFE

## A Better Office Life

DUOBACK CO., LTD. can upgrade the quality of everyday life, even in the office.  
Optimized chair offers better efficiency and satisfied results.

## LATEX CHAIR

### A chair like nature

When considering the health, Latex Chair is your answer.  
World's first to use the 100% natural rubber instead artificial foam, it prevents know skin diseases or allergies making the user comfortable both the body and mind.

## TASK CHAIR

### Chair fit for me

Since people nowadays work on a chair more than 1/3 a day.  
So, we have designed the chair to decrease the fatigue and increase the efficiency.

## CONFERENCE CHAIR

### Springing Brilliant Ideas

Meet our Conference Chair which the user can be more comfortable.  
With the help of ergonomic design to understand the curves of the body, enhances the concentration during conferences.

## The moment you sit on DUOREST chair “Comfort Science” begins

Due to countless meetings and long time sitting, your back never truly rest a single day.  
If you can't change your career, then change your chair.  
A chair that was born by science- DUOREST can make your day more comfortable.

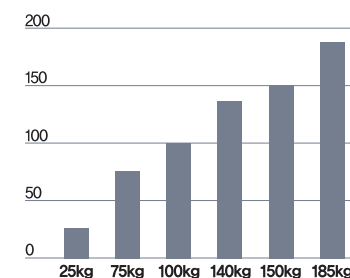

Dr. Matthias Brünig  
The founder of  
DUOREST theory

## Importance of proper posture

Scottish and Canadian Researchers' North American Radiology research report expressed that 90° postures induced the spine disc to slip more compared to other positions of leaning forward and back based on MRI scans. This research is attracting attention for going against the notion that sitting upright is beneficial for the back and spine. (UK BBC News)

## Weight Loss

MAN-20Kg WOMEN-14Kg

### The pressure put on Lumbar #3 & #4 Discs

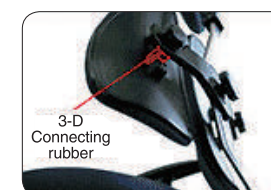

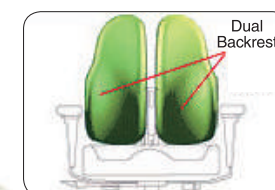

- 25kg** Lying flat with back on floor (1/3 of body weight)
- 75kg** Lying side ways (body weight)
- 100kg** Standing straight (1.5X of body weight)
- 140kg** Sitting straight on a chair without backrest (2X of body weight)
- 150kg** Standing while leaning forward 20 degree (2X of body weight)
- 185kg** Leaning forward 20 degree while sitting (2.5X of body weight)

By sitting down properly you can reduce the stress by 30%

## What is Rucksack Effect?

### Applies acupuncture on the entire back similar to a rucksack

It is less tiring to walk with a rucksack regardless of the extra weight because a waist brace distributes the stress equally within the back muscles. DUOREST's two separate backrests and the special operation 3D latex react to the user's movements providing the massage effect similar to those of a rucksack on the back muscle and the lumbar region.

## What is Dynamic Sitting?

### Even if you change posture, you will still have full support

Those who sit for a long time subconsciously move around and change their position to prevent fatigue. DUOREST firmly wraps the back muscles and spine while maintaining stability and support as the user changes position, lessening the weight applied by approximately 20Kg.

Ergonomic chair meets Natural Latex

## World's **FIRST** Natural Latex foam Chair **DUOTEX**

Ergonomic chair meets Natural Latex !  
Through Duotex, you can enjoy your lifestyle even more  
With additional comfort and pleasure

### Environment-Friendly Material

Natural Latex rubber is gathered at the rubber tree in the tropical area native to South-East Asia

- Natural Rubber 100% (Additive excluded) / Made in Korea

### Quality mark obtained from Germany

German certification agency **LGA**, which test the durability, elasticity, tensile force, confirmed natural latex quality

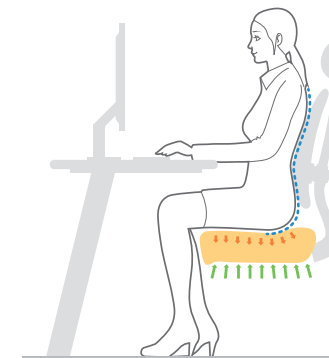

German certification agency **ECO**, which test the content and constituent of natural latex quality

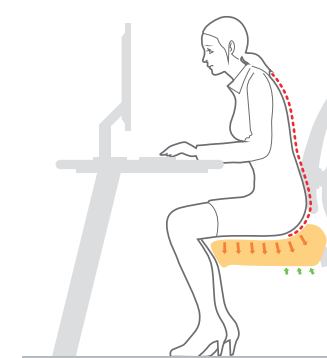

### Outstanding Antibiosis

Since, germs, which can cause skin disease or allergies can not inhabit, you can relax and sit.

**100%** NATURAL LATEX FOAM  
**DUOTEX**

High density Latex

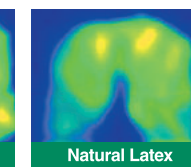

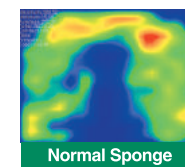

Low density Latex

High density latex is well balanced for the human body when seated, which leads to best performance according to the body line. So the person sitting will feel the comfort even when sitting for a long time.

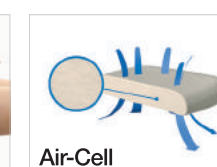

### Body pressure decrease effect

You can actually see the thigh and hip pressure dispersion at the difference between normal sponge seat pan(L) and our natural latex seat pan(R).

### The best feeling when seated

With the breathable Air-Cell cushion provides cool seat pan in summer and warmth in winter.

# Task Chair

A chair reducing fatigue in the office

You can enhance the work efficiency through the task chair caring the health and comfort. The backrest which always maintains a pleasant feeling, provides optimized comfort to the user based on the natural human physics.

High air-circulation and tension of the mesh gently but firmly supports the spine with practical but elegant design. We can't reduce the weight of the responsibility, but we can reduce the fatigue on the body.

DUOREST will guard your status.
